## STATISTICS OF CITIES, 1919.

### PREFACE.

For some time past there has been a growing demand from officials, financial corporations, economists and others interested in taxation and similar problems, for comparative statistics of the more important municipalities throughout Canada, more particularly statistics of municipal finance. Jurisdiction with regard to municipalities is vested in the Provincial Governments, and the first essential for comparative statistics is the adoption of a uniform system of municipal accounting and reporting. A memorandum outlining a system, and looking to co-operative action between the Dominion Bureau of Statistics and the Provincial Departments, was drawn up in the Bureau in 1918 and submitted to the Provinces. It was recognized, however, that the matter was complex and far reaching in scope, and that definite action would not be feasible without careful discussion of details, such as might take place at a conference of Dominion and Provincial officials.

Pending such discussion it was thought that a useful purpose might be served if a limited survey was undertaken by the Bureau on the lines suggested. A schedule was accordingly sent to urban centres having a population of 10,000 and over, and the present report is based on the replies received. The Bureau tenders its grateful thanks to the municipal officers, who, sometimes at considerable difficulty, in view of the diversified methods of accounting which prevail, filled in the schedules with the data asked for. Without such co-operation a statement, even of the present limited scope, would have been impossible, the usual annual statements not being available for co-ordinated results in view of the different significance attached to items in various localities.

Altogether, returns were received from fifty-three municipalities having a population of 10,000 and over. In a few cases, notably Guelph, Moncton and St. Catharines, the reports sent in were not sufficiently detailed to permit of co-ordination with others, whilst no returns were received from Chatham, Ontario, Shawinigan Falls, Quebec, and Glace Bay, Nova Scotia.

The matter covered in the report is grouped in a series of eight tables, the scheme of which will be noted in the analytical table of contents.

As above stated, the present report is regarded as tentative. The inquiry, however, is thought to have demonstrated the feasibility of procuring municipal statistics in general on a comparative scale when more definite plans have been matured. The experience already gained will permit additions to the schedules, particularly in reference to the classification of financial items. It is the intention of the Bureau to repeat the inquiry if its usefulness is demonstrated, and to embrace an increasing list of municipalities.

The report was prepared by Lt. Col. J. R. Munro as in charge of the Finance Division of the Bureau.

## STATISTIQUES URBAINES, 1919.

## PRÉFACE.

Depuis plusieurs années, les fonctionnaires, les établissements financiers, les économistes, en un mot tous ceux qu'intéresse le problème de la péréquation des impôts, ressentent le besoin de statistiques comparatives des principales cités et villes du Canada, tout spécialement des statistiques financières municipales. Les municipalités sont placées sous la juridiction provinciale; il fallait donc, tout d'abord, faire cesser la diversité de leurs méthodes de comptabilité et les amener à l'adoption d'un système uniforme. En 1918, le Bureau Fédéral de la Statistique élaborait et soumit aux provinces un projet qui proposait un système de comptabilité et qui établissait la coopération des provinces et du Bureau. Mais l'on dut bientôt admettre que la question était plus complexe qu'on ne l'avait d'abord supposé et que tout changement entraînerait des répercussions imprévues. Il fut donc décidé de recourir à une conférence des fonctionnaires fédéraux et provinciaux, où la question serait examinée sous toutes ses faces et traitée à fond.

Mais en attendant qu'une solution intervienne, on a jugé qu'il était possible de procéder à une investigation limitée, sur les bases suggérées. Un questionnaire fut donc dressé et envoyé aux municipalités dont la population atteint au moins 10,000 habitants; les réponses faites à ce questionnaire ont servi à l'établissement du présent rapport. Le Bureau exprime ici ses remerciements aux fonctionnaires municipaux qui ont rempli ces formulaires, quelquefois au prix d'un travail ardu, lorsque leur comptabilité ne concorde pas avec le questionnaire. Sans leur bienveillante coopération, il eût été impossible d'obtenir les données nécessaires, même dans un cadre restreint, en raison non seulement des diverses modalités de tenue des livres, mais aussi de la signification différente donnée à certaines expressions, d'une localité à une autre.

Cinquante-trois agglomérations urbaines, comptant 10,000 habitants ou plus, ont participé à notre enquête. Quelques-uns des rapports qui nous ont été envoyés, notamment ceux de Guelph, de Moncton et de St. Catharines n'étaient pas suffisamment détaillés pour servir à nos fins; ils ont dû être laissés de côté. D'autre part, les municipalités, de Chatham, Ont., Shawinigan Falls, P.Q., et Glace Bay, N.-E., ont négligé de nous fournir les informations demandées.

Les données recueillies ont été groupées dans une série de huit tableaux, dont on trouvera l'énumération à la table des matières.

Nous répétons que le présent rapport est nécessairement imparfait; il démontre, toutefois, la possibilité d'établir des statistiques municipales, comparables de ville à ville, lorsqu'un accord définitif aura été conclu entre les intéressés. L'expérience déjà acquise permettra certaines additions aux formulaires, notamment dans la classification de la partie financière. Si l'utilité de cette tentative est démontrée, le Bureau la renouvellera et en élargira le cadre, de manière à embrasser un plus grand nombre de municipalités.

Ce rapport est l'œuvre du Lt.-col. J. R. Munro, chef de la Division des Finances de ce Bureau.

## NOTE.

Le manque d'espace n'a pas permis de placer à la tête des tableaux la traduction française des titres et des sous-titres. Toutefois, afin de faciliter l'étude de ce rapport par ceux qui ne sont pas familiers avec la langue anglaise, la table des matières en français contient plus de détails que la version anglaise et constitue une traduction littérale des titres et sous-titres des tableaux, dans l'ordre exact où ils sont imprimés dans le texte anglais.

A la suite de la table des matières on a placé une traduction des renvois au bas des pages, qui se trouvent dans le texte anglais, avec indication de la page et du numéro de chaque renvoi.

Afin de permettre la comparaison entre les cités et les villes de population à peu près semblable, on les a divisées en plusieurs groupes, ainsi composés.

GROUPE I.—Cités dont la population atteint ou dépasse 100,000 habitants.

GROUPE II.—Cités ayant une population de 50,000 à 100,000 habitants.

GROUPE III.—Cités ayant une population de 25,000 à 50,000 habitants.

GROUPE IV. Cités ayant une population de 10,000 à 25,000 habitants.

Dans le tableau 3, pages 13 et 15, la huitième colonne est consacrée à la méthode employée pour la purification de l'eau des aqueducs. Nous donnons ci-dessous les termes dont on s'est servi dans le texte anglais, avec leur traduction en regard:
